Note 1. The recommended storage temperature is 20ºC to 30ºC, battery life would be reduced if stored at high temperature (The recharging interval should be 12 months under the condition of storage temperature < 30ºC, and 8 months under the condition of 30ºC < storage temperature < 40ºC).

Note 2. Affected by the external environment factors, such as temperature and duration of transportation and storage, the rated capacity may fluctuate by ±5%
